About Project Hope

Project Hope celebrated World Sickle Cell Awareness Day 2024 with the theme "Hope Through Progress: Advancing Sickle Cell Care Globally." This initiative, executed in collaboration with Aghogho Sickle Cell Care Foundation, Lagos State Sickle Cell Society, The Heart Menders Foundation, and Health Volunteers Nigeria Initiative, targeted the Oshipitan community in Bariga, Lagos State.

Project Hope aimed to raise grassroots awareness about the prevention and management of sickle cell disease. Activities included free genotype testing, distribution of free medications to sickle cell patients, and educational sessions on prevention and management strategies. By providing these essential services and information, Project Hope sought to empower the community, enhance care for those affected by sickle cell, and promote proactive health measures to prevent the disease.

Impact Overview

Pre-event Community Awareness

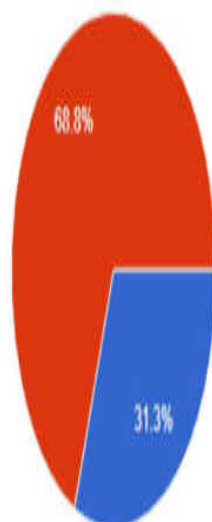

Before the main event on June 29, 2024, Project Hope team conducted a door-to-door and street-to-street awareness in the Oshipitan community. A pre-project survey of 16 people revealed that 62.5% were under 18, 25% were aged 18-25, 6.3% were aged 36-45, and 6.3% were 46 and above. Notably, 68.8% did not know their genotype, while 31.3% did. When asked to rate their knowledge of sickle cell on a scale of 1-4, 62.5% rated it 1, 25% rated it 2, and 6.3% rated it 3 and 4 each.
